

Key Information for Investors

This Key Investor Information Document (KIID) is intended for investors and contains key investor information about this fund. This KIID is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it in order to make an informed decision about whether to invest.

Simplicity Afrika

ISIN: SE0001702408

Simplicity AB

Corp. identity number:

556611-4723

Financial objectives

Simplicity Afrika's main investment objective is, in observance of due care, to achieve the highest possible growth in value and that a good diversification of risk is obtained. Simplicity Afrika targets

investors who seeks a long term investment-horizon (at least five years) in African companies. The fund may therefore be inappropriate for investors with a shorter investment horizon.

Investment strategy

The fund invests in companies geographically linked to Africa and seeks to achieve a good diversification across various industries and countries. The portfolio is managed according to a quantitative investment process. The investment process has a long-term investment-horizon and investment decisions are based on an analysis of trends as well as value and quality factors, with the expectation to generate high risk-adjusted returns. Therefore returns may deviate materially from the performance of similar funds and the market over time.

A minimum of 75% of the fund's assets are invested in equities

or equity related instruments and the fund may invest up to 10% of its assets in unlisted shares. The fund may invest up to 10% of its assets in fund units.

The fund will typically not distribute dividends, instead all income is reinvested in the fund.

The fund may use derivatives for efficient portfolio management purposes in order to help manage risks and reduce costs.

Generally, subscriptions and redemptions of fund units can be executed daily.

Risk level/Potential Return

As the fund invests in emerging markets which can produce great stock market fluctuations over short periods of time, the investment horizon should be long-term. Unit holders must therefore accept substantial price fluctuations. The fund invests in local currency, which means that there is a currency risk. Returns may be affected by currency fluctuations, political risks and potential natural disasters.

The risk/reward indicator illustrates the relationship between risk and potential return for an investment in the fund. The indicator is based on how the fund's value has changed over the last five years.

Currently this fund is in category 6, which means that the risk for value changes to both the upside and downside in the fund is high. Please note that category 1 is not an indication of the fund being risk free. The fund can move both left and right on the indicator over time. This is a function of the indicator being based on historical data which is not a guarantee for future results, which may vary.

The fund invests in companies listed on stock markets that are generally characterized by high risk, but also by a potentially high return. The indicator mainly reflects the higher levels of price fluctuations of the equities that the fund invests in.

The indicator reflects the most important risks in the fund, but not the risk that, in extreme market conditions, not being able to buy or sell units in the fund in the exposed timeframe (liquidity risk) and not the risk of loss due to system failure, human error (operational risk) or external events.

Charges

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before you invest or before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing charges	1,99%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

Your distributor can provide you information regarding current fees.

Ongoing charges show the amount paid for management, administration, marketing and other costs of the fund. Transaction costs are not included. The charges represents the calendar year 2017. It may vary from one year to another.

The charges are used to pay the costs of running the fund, including the costs of marketing and distributing the fund. These charges reduce the potential growth of the investment.

Past Performance

The fund's performance (return) is calculated after deduction of ongoing charges. Any entry and exit charges have not been taken into account. The performance for all years has been calculated in Swedish kronor and with dividends reinvested in the fund.

The fund's benchmark is also included in the chart. The fund does not intend to track its benchmark.

Past performance is not a guarantee for future performance. The fund was launched May 19, 2006.
