

Key Information for Investors

This Key Investor Information Document (KIID) is intended for investors and contains key investor information about this fund. This KIID is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it in order to make an informed decision about whether to invest.

Simplicity Småbolag Sverige C

ISIN: SE0010663443

Simplicity AB

Corp. identity number:

556611-4723

Financial objectives

Simplicity Småbolag Sverige's overall main investment objective is, with due care, to achieve the highest possible value growth and that a good diversification of risk is obtained. Simplicity Småbolag Sverige targets investors who seek a long term investment-horizon

(at least five years) in small and medium-sized Swedish companies. The fund may therefore be inappropriate for investors with a shorter investment horizon. The fund's benchmark is Carnegie Small Cap Net Return Index Sweden.

Investment strategy

The fund invests in shares in small and medium-sized companies geographically linked to Sweden and seeks to achieve a good diversification across various industries. The portfolio is managed according to a quantitative investment process. The investment process has a long-term investment-horizon and investment decisions are based on an analysis of trends as well as value and quality factors, with the expectation to generate high risk-adjusted returns. Therefore returns may deviate materially from the performance of the market over time.

A minimum of 75% of the fund's assets are invested in equities

or equity related instruments. The fund may invest up to 10% of its assets in unlisted shares. The fund may invest up to 10% of its assets in fund units.

The fund may use derivatives for efficient portfolio management purposes in order to help manage risks and reduce costs.

Share class C is accumulating, which means that dividends are normally not distributed, all income is reinvested.

Generally, subscriptions and redemptions of fund units can be executed daily in both share classes.

Risk level/Potential Return

About the indicator: The risk/reward indicator illustrates the relationship between risk and potential returns from an investment in the fund. As the fund lacks a historical performance of five years the indicator has been determined using data from Carnegie Small Cap Net Return Index Sweden for the period that the fund has no historical performance.

The fund's investments: The fund belongs to category 5 which means high risk for both increases and decreases in the value of fund units. Category 1 does not mean that the fund is a risk free investment. Over time the fund may shift to both the right and the left on the indicator scale. This is because the indicator is based on

historical data which is not a guarantee for future risk and returns. The fund invests in companies listed on equity markets which generally are characterized by high risk but also the potential for high returns. The indicator mainly reflects the increases and decreases in the value of the shares that the fund invests in.

Risk factors not shown through the indicator:

Liquidity risk

Smaller companies often have a lower turnover of their shares and the fund may also hold larger positions in individual holdings. This means that the liquidity risk for this type of fund may be higher than in a fund investing only in large companies with high turnover of the outstanding shares. During more stressed market conditions when demand for shares in small companies decreases, greater redemptions in the fund may result in sale of securities at a discount in price and redemption of fund units can not, in extreme cases, be executed immediately upon request. This places greater demands on the management of liquidity and the composition of the fund in order to manage its liquidity risk in an effective manner.

Charges

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before you invest or before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing charges	0,49%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

Your distributor can provide you information regarding current fees.

Ongoing charges show the amount paid for management, administration, marketing and other costs of the fund. Transaction costs are not included. The charges represents the calendar year 2017. It may vary from one year to another.

The charges are used to pay the costs of running the fund, including the costs of marketing and distributing the fund. These charges reduce the potential growth of the investment.

Past Performance

The share class C was launched on January 2, 2018 and therefore has no historical return.
