**What is this product?**

<b>Type</b>	Securities fund
<b>Term</b>	The Fund does not have a fixed date of expiry. The fund management company retains the right to close the fund and redeem the units. For more information, please refer to the prospectus.
<b>Objectives</b>	The fund is an actively managed long-term fixed income fund that invests mainly in global corporate bonds and corporate credit. Through analysis and selection, the managers make active investment decisions, which means that deviations from the market can be both larger and smaller over time. The fund's goal is to achieve the highest possible results for the fund's assets, with regards to the fund's investment policy. The Fund may invest both fixed income securities with a high or low credit rating and in those with a high credit rating (investment grade). For investments with low or non-existent credit ratings, investments are not made in securities with a credit rating lower than B or equivalent. The Fund may use derivative instruments, including OTC derivatives, for the purpose of streamlining management and protecting the Fund's assets. Investments in foreign currency will be hedged to SEK using derivative instruments. The fund may invest a maximum of 10% of the assets in fund units. The fund may invest a maximum of 10% in so-called unlisted instruments. Share class A is accumulative, which means that dividends are reinvested. Unit class B pays dividends and has as its starting point the distribution of the previous financial year's return on a fund unit in share class B. The annual dividend in unit class B does not affect the fund value in unit class A. However, the dividend changes the ratio between the value of unit class A and B. The fund's benchmark index consists of 50% Bloomberg Barclays Global High Yield Total Return Index Hedged SEK and 50% S&P Sweden Investment Grade Corporate Bond Index Total Return. The fund's return is determined by how the holdings in which the fund invests increase or decrease in value during the holding period. Purchases and sales of fund units can normally take place on all Swedish banking days for both share classes.
<b>Intended Investor</b>	This Fund may be appropriate for those who plan to stay invested for at least 3 years and who are aware that their investment in the Fund may go up or down in value, and that there is no guarantee that they can recoup all of the capital initially invested. No prior knowledge or experience of securities funds or financial markets is required in order to invest in the Fund.
<b>Depository institution</b>	Skandinaviska Enskilda Banken (publ). The annual report, semi-annual report, prospectus, latest unit price and other practical information is available at no cost in Swedish and English at <a href="http://www.simplicity.se">www.simplicity.se</a> , alternatively <a href="https://www.simplicity.se/en/">https://www.simplicity.se/en/</a> .

**What are the risks, and what returns may I get?****Risk indicator**

The summary risk indicator provides an indication of this product's level of risk in comparison to other products. It shows the probability that this product will lose value as a result of market developments. The Fund is classified as 2 out of 7, i.e. a low level of risk. This means that there is a low risk of rises and falls in the unit value of the Fund. The indicator primarily reflects rises and falls in the securities in which the fund has invested. Risks that are not reflected by the risk indicator: Counterparty risk - the risk that a counterparty fails to fulfil its commitments to the Fund, such as by not paying an agreed-upon sum or not making agreed-upon deliveries of securities. Operational risk - the risk of losses due to e.g. system failures, human error or external events. This product does not include any protection against future market developments. You may therefore lose some or all of your investment.

## Return scenarios

The returns you may receive from this product are dependent on future market developments. The future development of the market is uncertain and cannot be predicted with certainty. These figures include all charges for the product itself, but do not reflect any charges that you are liable to pay to your advisor or distributor. These figures also do not reflect your personal tax situation, which may also affect the amounts that you will receive. The negative, neutral and positive scenarios reflect the worst, average and best returns that this product has generated over the last 10 years. The markets may develop in entirely different ways in the future. The stress scenario shows the returns you may receive under extreme market conditions. This scenario was applicable to one investment between 2011-2021.

Scenarios	Investment of SEK 100,000	1 year	3 years (Recommended investment horizon)
<b>Minimum</b>	<b>There is no guaranteed minimum return. You may lose some or all of your investment.</b>

## What happens if Simplicity AB is unable to make payments?

By law, the Fund's assets may not be held by the fund management company. Instead, each fund must have an assigned depository to manage the possession of the Fund's assets. In the event of the fund management company's insolvency, management of the Fund is taken over by the depository. There is no compensation arrangement or guarantee scheme for investors in the Fund.

## What are the charges?

The person giving you advice about or selling the product may charge you further fees. If this is the case, the person in question shall inform you about these charges and how they affect your investment.

### Charges over time

The tables show the sums charged to your investment to cover various types of costs. The size of these sums is dependent on how much you invest, how long you hold the product and how your product performs. The sums shown here are based on sample figures for the investment size and various possible investment horizons.

We have applied the following assumptions: For the first year, you will get back the amount that you have invested (0% annual return). For 3 years, we have assumed that the product performs in accordance with the neutral scenario. The investment amount is SEK 100,000.

Investment of SEK 100,000	If you redeem after 1 year	If you redeem after 3 years
<b>Total charges</b>	1 068 SEK	5 802 SEK
<b>Annual cost effects*</b>	1,1%	1,1%

\*This illustrates how costs will decrease your return every year during your investment period. It shows e.g. that if you redeem your units at the end of the recommended investment period, your average return per year would be 3,2% before charges and 2,1% after charges.

As compensation for their services, the person selling this product to you may receive a part of the charges you pay us. You will receive information about this amount.

## Breakdown of charges

The sums in SEK are based on an investment of SEK 100,000.
